Subsea Mining Energy

Diesel HPU

Blakemere Hydraulic Power Unit

Offshore intervention tooling is only as available as its hydraulic supply. Vessel ring mains are frequently committed to other systems, unavailable on vessels of opportunity, or unable to deliver the flow and pressure subsea tooling demands. A self-contained, diesel-driven HPU can remove that dependency.

Blakemere's HPU is a skid mounted, diesel powered unit designed for use in the offshore oil and gas industry. It supplies hydraulic flow of up to 120 lpm @ 2750 psi.

Features & Benefits

Dedicated
Lift Rigging

Quick-disconnect
hydraulic couplers

Diesel
Driven

Skid frame, forklift pockets
and sea-fastening points

Technical Specifications

Dimensions L x W x H	1.85 M x 1.4 M x 1.36 M
Weight	1500 kg
Maximum Pressure and Flow	120 lpm @ 2750 psi
Hydraulic Oil Reservoir Capacity	180 Litres
Diesel Fuel Tank Capacity	125 Litres
