

BLAKEMERE
Subsea Mining Energy

DWS1230

Diamond Wire Saw 12" to 30"

The Blakemere DWS1230 is designed to cut a wide range of structures, including pipelines, caissons, chains, wire ropes, and jackets.

It can accommodate any tubular structure ranging from 12" to 30" in diameter. Deployment can be via direct ROV mounting or surface deployed.

Features & Benefits

- Cut any subsea structure from 304.8 – 762 mm (12 – 30 in)
- Can cut through most protective coating
- Fine Metering Valve to optimise efficiency
- Surface or ROV deployable
- Can be handled and operated by any work class ROV
- Made from corrosion resistant materials

Technical Specifications

Weights & Dimensions

Footprint	1,700 x 1,720 x 620 mm (66 x 67 x 24 in)
Weight in Air (approx.)	400 kg

Other Specifications

Tubular Cutting Range	304.8 – 762 mm (12-30 in)
Hydraulic Requirements	50 L/min @ 2750 psi (13.2 gal US/min @ 189.6 bar)
ROV Requirement	Industry Work Class – 100 hp rating or aux power pack
